

BIOSPECTRA HISTORY

Premium Pharmaceutical Ingredients

Manufactured Exclusively in the USA - Premium Pharmaceutical Ingredients

From its humble beginning, BioSpectra remains a pioneer in the development and manufacture of fully validated GMP versions of Biological Buffers and other fine chemicals for a constantly evolving Pharmaceutical industry.

Launched in the foothills of the Poconos and rooted in Eastern Pennsylvania work ethic and culture, BioSpectra has expanded to become a regional, multi-plant manufacturer of High Purity Pharmaceutical Ingredients, serving the leading Pharmaceutical companies around the world.

Come visit with us as we journey through our history of growth...

1993 - 1995

The BioSpectra organization was created on December 26th, 1993 operating from offices near Shawnee on the Delaware. BioSpectra, Inc. (BSI) was first incorporated in Pennsylvania, USA, on September 15th, 1995.

1996

The original BioSpectra operated from a site in Sciota, PA, manufacturing reagent grade buffers and laboratory chemicals.

2001

In 2001, BSI opened the Stroudsburg, Rockdale Lane Facility and created the first fully dedicated manufacturing facility for the production of re-purified GMP Biological Buffers that changed the scale of available cGMP Biological Buffers available to the BioPharma Industry.

2006

In 2006, BSI created BioBuffer Solutions Brand to support the need for upstream materials to our critical customers. That brand will undergo further expansion at a new facility in 2024 / 2025.

2011

In 2011, we acquired a much larger facility located in Bangor, PA, so our manufacturing and portfolio of GMP Pharmaceutical Process Fine Chemicals, Excipients, and API's.

2019-2020

In 2019 & 2020, we acquired several other local properties to house external services such as our fleet of cars/trucks, building/ ground equipment, and non-controlled storage.

BIO SPECTRA HISTORY

Premium Pharmaceutical Ingredients

Manufactured Exclusively in the USA - Premium Pharmaceutical Ingredients

In April of 2021, BSI opened our Corporate Services Center in Wind Gap, PA. Also, in 2021, renovation work began on our Kilo GMP Facility in Rensselaer, NY now known as BDI (BioDevelopment Inc.)

More recently, in January 2023, we opened our 60,000 square foot GMP storage facility at Third Street in Stroudsburg, PA while opening our Kilo GMP Scale facility in Rensselaer, NY.

Future of BSI

And we are not done! We are busy working to expand our manufacturing footprints overseas and plan to open another 80,000 square foot facility adjacent to our GMP Storage facility in 2024/2025 to house our expanding analytical services and automated packaging operations.

Epilogue

The BioSpectra Organization continues to expand with technology in footprint and with people as we approach our 30th year in business with more sites and a compliment of over nearly 300 employees.

During the recent pandemic, BioSpectra played a crucial role in the production of Covid Vaccines and Drugs that helped millions of people navigate past chronic infections and death.

As the Pharmaceutical Industry continues to evolve, our focus remains on the synthesis and purification of critical biological buffers, key processing GMP Fine Chemicals, and Functional Excipients and API's.

Over the past thirty years, BioSpectra has created a global brand as the most trusted and most reliable source of Premium Pharmaceutical Ingredients, manufactured exclusively at our GMP Facilities here in the USA. Our mission is to always exceed our customer's expectation for high quality product and service while fully remaining compliant in regards to US and EU Pharmaceutical Quality and Regulatory Standards.
